Education

Earlham College

Bachelor of Computer Science | GPA: **3.88** (Expected May 2028)

Richmond, Indiana

August 2024 – Present

Relevant Coursework: Data Structures, Algorithms, Principles of Computer Organization, Cybersecurity, Programming and Problem Solving, Calculus A, Computing Skills, Software Engineering (Spring 2027)

Iwate University

Exchange Student, Computer Science & Japanese Language

Morioka, Japan

August 2026 – Present

Teaching English to middle school students at Kuroishino Middle School

Experience

AI Product Manager Intern

Indeed (Recruit Holdings)

June 2026 – August 2026

Tokyo, Japan

- Proposed and **owned** an **AI B2B product** from idea to working prototype, integrated with Recruit's **AirWORK** ATS to centralize companies' hiring workflows on one platform
- Shaped product direction through **market research**, **user interviews**, and **client meetings**, using Recruit Works Institute and Indeed Hiring Lab data
- Ran **A/B tests** with **7 employers** to validate hypotheses and iterated using feedback and data
- Collaborated with senior engineers, senior PMs, and UX/UI designers; designed the **Python** backend architecture integrating the **OpenAI API** and led development of the **React** frontend UI
- Pitched to client **CEOs** entirely in **Japanese**; the product gained **recognition** from Indeed stakeholders, and the mentoring PM committed to continuing its development

Full-Stack Software Engineering Intern

Augeo

June 2025 – August 2025

Minneapolis, MN

- Revamped Augeo's internal DevOps website, improving UI responsiveness and site performance
- Implemented Single Sign-On (SSO) using **Okta** via **AWS** Cognito, enabling secure access to resources
- Built a **Node.js/SQL** backend for data extraction and visualization, **halving** data access time

Projects

Shiritori Game: A Japanese Vocabulary Puzzle Game

- Created a gamified web version of the Japanese word-chain game Shiritori for vocabulary practice
- Built the UI in **React** and wrote Japanese/English word-validation logic using a dictionary API
- Played by **400+** users and received **10** GitHub stars, available at: [Shiritori-game](#)

Anki Language Switch

- Built an **open-source Python** Anki add-on that reverses bilingual flashcard decks for language learning
- Integrated a local **Qwen2.5-7B LLM** to parse each deck's fields and generate the converted card **HTML**
- Implemented audio generation via local **Piper TTS**, available at: [Language Switch](#)

Skills

Product	Product Strategy, A/B Testing, Data Analysis, Market Research, User Interviews, Figma
Technical	JavaScript, TypeScript, Python, SQL, React, Node.js, OpenAI API, Claude Code, Git
Languages	Fluent in Arabic, English, and Japanese

Leadership & Activities

Lead Organizer, Harumatsuri (Japanese Spring Festival)

Earlham College

April 2026

Richmond, Indiana

- Led a student team from planning to execution, delegating food, budget, decoration, and entertainment
- Drew **30+** local community members; recognized as Earlham's **best** Harumatsuri to date

Head Guitar Teacher

Ibdaa Cultural Center

September 2019 – September 2022

Bethlehem, Palestine

- Volunteered teaching **20** refugee students aged **11–14**, showcasing their progress at **fundraising** events
